

## SIX PESTICIDE COMPANIES OWN MUCH OF THE WORLD'S SEED SUPPLY

MONSANTO	BAYER <small>NOT IN HAWAII</small>
SYNGENTA	DUPONT-PIONEER
DOW CHEMICAL	BASF

THE SAME COMPANIES THAT ENGINEER THE SEEDS ALSO MAKE AND SELL THE PESTICIDES, SO THEY PROFIT TWICE. THESE COMPANIES ACCOUNT FOR 58% OF GLOBAL SEED SALES AND 72% OF THE WORLD'S PESTICIDE SALES.

## HAWAII IS GROUND ZERO FOR TESTING GENETICALLY ENGINEERED CROPS

In 2014, Hawai'i had over 6X more genetically engineered crop test sites than California.

## PESTICIDE-SEED COMPANIES THREATEN HAWAII'S FOOD SECURITY AND ENVIRONMENT

Genetically engineered crops increase use of weed-killing pesticides (a.k.a. herbicides).

### MORE HERBICIDE

In 2014, 82% of GE crop field tests in Hawai'i involved crops designed to survive intensive use of herbicides.

### NOT FOOD

91% of GE seed crops tested in Hawai'i are inedible corn or soybeans.

### LESS LAND FOR FOOD

GE seed crops in Hawai'i occupy as much land as all harvested fruits and vegetables in the Islands combined (excluding pineapple).

### FEW JOBS

Pesticide-seed companies provide less than 0.5% of total Hawai'i jobs.
